

# DOAC Safety Profiles

- **Apixaban** may be ideal for elderly patients or those at increased risk of bleeding
- Apixaban is the only DOAC approved in **ESRD**
- Rivaroxaban and edoxaban are dosed **once a day** and may be ideal for patients struggling with adherence
- Bioavailability of **rivaroxaban** is dependent on oral intake

**Remember to choose warfarin over a DOAC in**

Valvular atrial fibrillation

Mechanical heart valves

Severe hepatic impairment

BMI > 40 or Weight > 120 kg

Anti-phospholipid syndrome
