

# Hypercoagulable Workup

Risk factors\* for inherited thrombophilia or other disorder?

Will testing change management?

Send workup

**Avoid testing in these situations**

At time of acute VTE

While on anticoagulation

Clot provoked by major risk factors

**Situations that may warrant testing**

Unprovoked VTE age < 45

Recurrent thrombosis

Strong family history of VTE

VTE in unusual location (cerebral veins, splanchnic veins)

Arterial thrombosis

Repeat fetal loss at >10 weeks gestation
